

Oldcode problem: title screen/winlose screen works, but the title screen only appears when enter is pressed and not on load

Newcode:

changes:

added `Text.Color = textColor;` in the `Setup` method to properly initialize the text color

created a separate DrawCurrentScreen() method to avoid code duplication and ensure consistent drawing

called `DrawCurrentScreen()` at the end of `Setup` to ensure the initial screen is drawn.

improved the Enter key handling logic to be more robust

made text color handling more consistent across different screens
